-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin, Jr. in view of the Prior Art admitted by Applicant on page one of the specification, see MPEP 2129.

Martin, Jr. show a mixing faucet where the lower part of casing 11 is read as a connection element, adaptor 50 is the insertion piece with seals 80, 37. Adaptor 50 is inserted in the longitudinal direction of the cartridge.

The Martin, Jr. valve is displaced and rotated in a customary manner but Martin, Jr. is not explicit about the actuation. Applicant has admitted to Prior Art including a control disc driven through a ceramic moving element by means of a driving arm pivoted in a rotatable lever holder to displace and rotate the control disc. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have used such a Prior Art actuator to displace and rotate the Martin, Jr. control disc in that it is one of the customary means of doing so, as suggested by Martin, Jr.

Applicant's remarks have been fully considered but are not deemed to be persuasive. Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references. Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
